

Design Goes Toward Coniferous Wood. Thuja

Thuja 047028
combined with
single-colour metallic green 091005-773

The illustration of the décors shown here may differ from the original due to the printing technique used – we will be pleased to provide you with colour-accurate samples on request.

Interprint's Thuja décor is in line with the currently trendy coniferous wood. This furniture décor emphasises the beauty of larch by a clearly contoured stripe structure. Half-cut flowers and soft annual rings strengthen the exquisite appearance.

Ideal combination partners for Thuja are single-colour metallic décors in strong colours. The combination with metallic green gives fronts and surfaces vigour. The effect is clear, strong and refreshing.

Strong in Character and Versatile. Fleedwood

Fleedwood 010321
combined with
single-colour metallic rust red 091005-770

The illustration of the décors shown here may differ from the original due to the printing technique used - we will be pleased to provide you with colour-accurate samples on request.

Typical oak but completely independent, the Fleedwood décor has a powerful effect due to its multi-faceted grain consisting of flowers, stripes and medullary rays. A white pore provides contrast and luminosity. This makes it suitable for classic and modern furniture.

Metallic rust red is a combination partner that makes the high-quality look perfect because the single-colour compensates the dynamism of the grain. Structure and colour form a harmonious pair that upgrades furniture and work-tops.
